## Founders & Field Teams

Tateyoko Research Institute (TRI) was founded in Kyoto, Japan, in 2006, which was jointly founded by former senior fellows from SUMITOMO Corporation, MITSUBISHI ELECTRIC, and other Japan companies. We closely cooperate with University of Tokyo, University of Malaya and other research institutes in Japan. Besides, we also have field teams in Singapore, Hong Kong, Malaysia, and other places in Southeast Asia, and East Asia, to better cater to our clients need.

## Clients

Our consulting services are basically offering intellectual support to those companies, whose business is highly sensitive to policy changes such as import and export policies and exchange rates. In addition, we also provide professional advisory services on policy research and development planning for the public sectors. Our high level of commitment to service has resulted in a good partnership with our clients. Our clients includes local mutual funds and large trading and manufacturing companies, think tanks and universities, transnational corporations and public sectors not only in Japan but also from Southeast Asia and East Asia.

## Business Scope

We succeeded in connecting our clients to over 180 professionals from various industries, such as economic development, education, energy, environment, public health, and international relations, strategic planning and science and technology. Most of the experts come from Japan, Hong Kong, Europe and the United states.
